CHLORDET

DESCRIPTION

CHLORDET is a chlorinated general purpose alkaline detergent powder formulated as a cleaner/sanitiser for the food industry. It is non-corrosive at use dilution on stainless steel and plastic surfaces. Care should be exercised on alloy, brass, copper and aluminium surfaces to ensure concentrations are correct and that contact times are minimised. CHLORDET contains sequestering agents, specialised surfactants, and is medium foaming in character at use dilutions.

USES

CHLORDET is formulated for use as a general purpose detergent sanitiser. It contains 5.0% w/w available stabilised chlorine; present as sodium dichloroisocyanurate. It is readily soluble in hot or cold water, but should not be used at temperatures above 70°C. CHLORDET can be used in foam cleaning applications by preparing solutions in conjunction with FOAMING AGENT. CHLORDET can be used as a post cleaning sanitising rinse at 5 gms. per litre.

CHLORINE YIELD:

1:50 solution	-	1000 ppm chlorine
1:100 solution	-	500 ppm chlorine
1:200 solution	-	250 ppm chlorine

USE RATE

10 gm/litre (100 to 1) Standard Soils
20 gm/litre (50 to 1) Heavy Soils
Water temperature preferably hot to 70°C.

APPEARANCE

White free flowing powder

PACKAGING

10 kg Polythene pails
20 kg Polythene pails

The Product Information Sheet supersedes all previous issues for this product. Information contained herein is offered in good faith as being true and accurate to the best of our knowledge, but as the conditions of use are beyond our control, no guarantees are either stated or implied.

Where health or safety data given discloses a risk to the user or the environment, it is the responsibility of the purchaser to pass on the information to employees who may be using the product, ensuring that adequate safety procedures are used, including good industrial hygiene.
