### **DELTA WET 600** AGRICULTURAL WETTING AGENT

#### **DESCRIPTION**

DELTA WET 600 is a clear liquid which has been specifically formulated for use as a agricultural wetting agent.

#### **APPLICATIONS**

DELTA WET 600 is a specialty blend of non ionic surfactants specifically formulated for use with agricultural chemicals for increasing spray coverage.

#### **BENEFITS**

- Rapid penetration which is both deep and lateral (high spreading action) to ensure the herbicide has maximum contact on the foliage in the shortest possible time.
- Improved wettability at lower concentrations to provide a more cost efficient system.
- Improved cost storage properties – does not gel below 0°C.
- Excellent solubility in very cold water (ie 3°C-5°C). Dissolves instantly without the need of prolonged agitation, ie no gelling occurs during the mixing process.
- Improved stability in hard water conditions making it suitable for a diverse range of water quality including bore water.

#### **DIRECTIONS**

DELTA WET 600 has been formulated for use where the addition of a surfactant is specifically recommended on the agricultural chemical label. Higher dilution rates may be required in specific circumstances.

#### **MIXING:**

Dilute DELTA WET in water before adding the agricultural chemical to spray tank.

<b>SITUATION</b>	<b>APPLICATION RATE</b>	<b>CRITICAL COMMENTS</b>
Non-selective Herbicides	ML/100 LT SPRAY 40-150ml	Use higher dilution rates on hard to wet surfaces and dry soils.

The Product Information Sheet supersedes all previous issues for this product. Information contained herein is offered in good faith as being true and accurate to the best of our knowledge, but as the conditions of use are beyond our control, no guarantees are either stated or implied.

Where health or safety data given discloses a risk to the user or the environment, it is the responsibility of the purchaser to pass on the information to employees who may be using the product, ensuring that adequate safety procedures are used, including good industrial hygiene.

## Product Information Sheet

### **DELTA WET 600**

Page 2 of 2

Selective Herbicides in crop use	40-150ml	Use only when a surfactant is recommended on herbicide labels. Use higher dilution rates on hard to wet surfaces
Insecticides Fungicides and growth regulators	75-150ml	Use only when surfactant is recommended on product labels.
Paraquat and Diquat Herbicides	40-150ml	Vary dilution rate according to spray volume. Use according to dilution rates on product label.
Pasture topping for use with Glyphosate CT	200ml	
Watering of soil and reduction of dust. As additive to water.	75-150ml	

### **PACKAGING:**

- 5lt Polyethylene Bottles
- 20lt Polyethylene Drums
- 200lt Polyethylene Drums
- 1000lt Bulk Tanks

### **HEALTH AND SAFETY INFORMATION:**

Refer to separate Material Safety Data Sheet available on request.
