EMOLAN TEAT DIP EMOLLIENT

DESCRIPTION

EMOLAN is an emollient, formulated for use as an additive in teat dip and spray solutions. It is formulated with a synergistic blend of non-ionic humectants to promote soft supple skin.

APPEARANCE

EMOLAN is a semi viscous clear liquid, which clouds at lower temperatures. It has a pour point of around 3°C

PACKAGING

EMOLAN is packaged in 5 Lt and 20 Lt Polyethylene Drums.

METHOD OF USE

EMOLAN can be used to replace up to 20% of the water used in teat dip or teat spray solutions. It is compatible with Iodine dips at up to 20% addition.

EFFICIENCY

Field trials returned comments that EMOLAN was found to be more effective than glycerine. EMOLAN should be used rather than paraffin or emulsified bloat oils which may de-activate the antibacterial matter in teat sanitiser formulations.

COMPATIBLE FOR USE WITH ALL TASMAN TEAT DIPS AND SPRAYS
AT LEVELS OF UP TO 20%

The Product Information Sheet supersedes all previous issues for this product. Information contained herein is offered in good faith as being true and accurate to the best of our knowledge, but as the conditions of use are beyond our control, no guarantees are either stated or implied.

Where health or safety data given discloses a risk to the user or the environment, it is the responsibility of the purchaser to pass on the information to employees who may be using the product, ensuring that adequate safety procedures are used, including good industrial hygiene.
