# FREEDOM

## NO RINSE SANITISER

### DESCRIPTION

FREEDOM is a complex blend of quaternary ammonium compounds. Its superior germicide activity when compared to conventional quat based sanitisers combined with its "no rinse" properties provides the complete sanitising program.

### APPLICATION

FREEDOM is specifically used as the final rinse sanitiser at the end of the standard wash program.

### BENEFITS

- Broad spectrum biocidal activity against both gram positive and gram negative organisms.
- Better disinfectant performance at lower use concentrations.
- Greater hard water tolerance sanitising activity at lower use levels.
- Superior organic soil tolerance.

### DIRECTIONS FOR USE

FREEDOM is used at a dose rate of 1 : 500 to provide 150 ppm of active quat. At this concentration it has F.D.A. clearance to sanitise without the requirement of a potable water rinse. FREEDOM can be applied by spraying, fogging or mopping onto the required surface.

### SUITABILITY OF CHEMICALS FOR FOOD PREPARATION AREAS

FREEDOM is suitable for use in kitchens and food preparation areas

### HEALTH & SAFETY INFORMATION

See separate Material Safety Data Sheet available on request.

### PACKAGING

◆ 5 Litre Polyethylene drums      ◆ 20 Litre Polyethylene drums

The Product Information Sheet supersedes all previous issues for this product. Information contained herein is offered in good faith as being true and accurate to the best of our knowledge, but as the conditions of use are beyond our control, no guarantees are either stated or implied.

Where health or safety data given discloses a risk to the user or the environment, it is the responsibility of the purchaser to pass on the information to employees who may be using the product, ensuring that adequate safety procedures are used, including good industrial hygiene.
