PRODUCT INFORMATION

SINCE 1897

INTRA-UTERINE PESSARIES

THE PRODUCT

Rudduck's intra-uterine pessaries are effective against gram-positive and gram-negative bacteria with excellent dispersion within the uterus aided by the effervescent action when inserted. They aid in the treatment and prevention of metritis that may occur following abortion, retention of foetal membranes or vaginal lacerations. Another benefit is the strength of the antiseptic, which allows antibacterial activity to continue even in the presence of blood and pus.

COMPOSITION

The active ingredients in each tablet are:

- Chlorhexidine Dihydrochloride

USED FOR

- Cows
- Ewes
- Mares
- Sows

WITHHOLDING PERIOD

NIL

PACKAGING

- 24 pessaries per packet
- 12 packets per carton
