

SYKES VET INTERNATIONAL PTY LTD

PRODUCT INFORMATION

SINCE 1897

MINBAL 4 IN 1

THE PRODUCT

A compound mineral injection ready for instant use for the prevention and treatment of milk fever, grass tetany and allied mineral deficiency. Minbal 4 in 1 should be used when an animal does not respond to Double-Cal as the animal may be lacking in magnesium or phosphorous. In addition to calcium it contains dextrose to assist with complication from acetonaemia.

COMPOSITION

- Calcium (as calcium gluconate) 27.5g/L
- Magnesium (as magnesium hypophosphite) 4.7g/L
- Phosphorus (as hypophosphite) 12.2g/L
- Glucose 182g/L

USED FOR

- Cattle
- Sheep
- Goats
