### SUPER SHINE

#### DESCRIPTION

SUPER SHINE is a floor polish sealer based upon new high performance technology with an ease of application that can be considered virtually "goof proof".

#### APPLICATION

Apply three to four coats of SUPER SHINE onto vinyl floor tiles for a superior gloss finish. Application can be either by conventional or spray buff method. SUPER SHINE will produce a far longer gloss retention than polishes made with conventional polymers.

#### PERFORMANCE ADVANTAGES

- Achievement of "wet look" gloss.
- Ability to use low and high speed spray buffing as well as ultra-high speed burnishing equipment.
- Decreased labour and equipment costs for end users through a less frequent need to buff, burnish and recoat; and a reduction in the number of floor stripping operations.
- Low ammonia odour.
- Excellent recoatability.
- Low sensitivity to humidity during application.
- Unsurpassed repairability.
- Black heel mark wipeability.
- Very good resistance to powdering and dusting.
- Low tack free time.

#### SPECIFICATIONS

Polymer/ASR/Wax Ratio	85/5/10
Theoretical Non Volatile Solids	25%
Theoretical Density	1.02

#### Mop Application Test: SUPER SHINE vs. a Conventional High Gloss Polish
