Occupational Exposure Limits : Threshold Limit Values for (1,4)para-DICHLOROBENZENE

Time Weighted Average (TWA) = 150 mg/m³

Short Term Exposure Limit (STEL) = 300 mg/m³

Exposure Standards (TWA) is the time-Weighted average airborne concentration over an eight-hour working day, for a five day working week over an entire working life. According to current knowledge this concentration should neither impair the health or, cause undue discomfort to, nearly all workers.

STEL (Short Term Exposure Limit): the average airborne concentration over a 15 minute period that should not be exceeded at any time during a normal eight-hour work day.

NOTICE : Absorption through the skin may be a significant source of exposure
